Lexmark Document Automation Solutions

Overview

Verbella CMG has been delivering Document Automation Solutions built on Lexmark products since 2005. Our experienced consultants utilize their decades of experience to deliver turnkey Solutions that are designed to streamline your business processes. In addition to the Kofax suite of products we are now authorized to sell the Readsoft Process Director Suite for SAP.

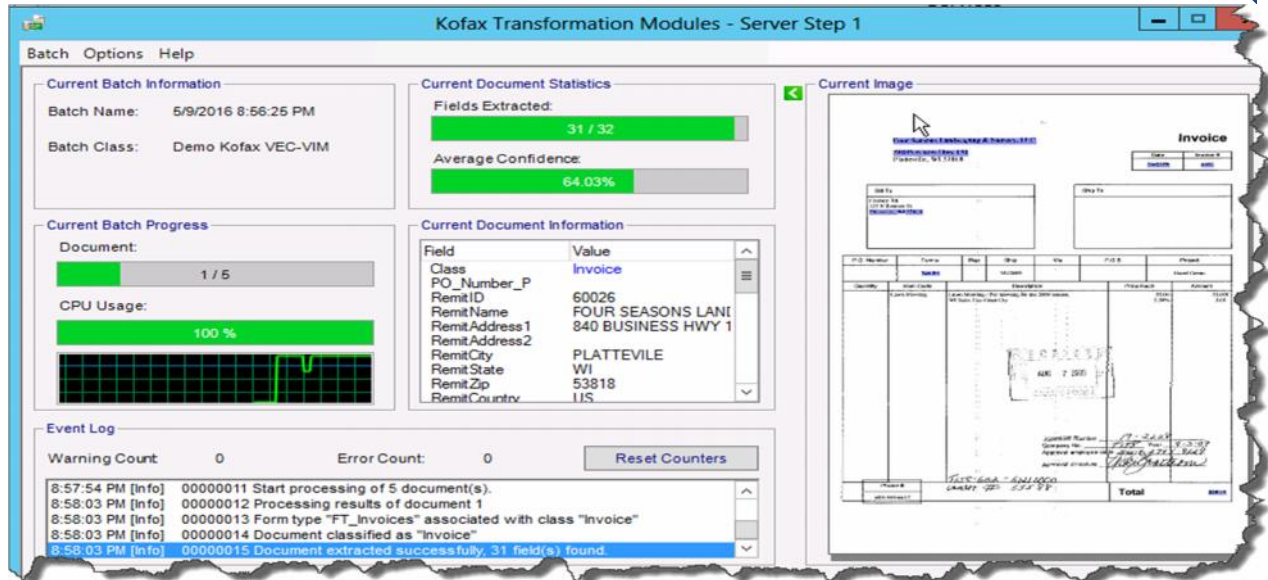

Solutions

Over the past 10 years the Verbella team has delivered on time and under budget, a wide range of Document Automation Solutions. A partial list includes:

- Financial Document Process Automation
- Claims Processing
- Mobile Capture
- SAP AP Automation
- SAP Sales Order Automation
- SAP HR Document Automation
- Mobile Capture
- Robotic Process Automation
- Electronic Signature Solution
- Document Processing Analytics
- Workflow Solutions

Mobile Capture Solutions

With the ever growing usage of Mobile Devices the Kofax Mobile Capture Solution and SDK allows our customers to better service their customer's needs. From initiating the customer onboarding process to filing insurance claims to approving invoices on the run, Verbella can fine tune a mobile solution to increase your business process efficiencies. Turn your employees and customer's mobile devices into remote tools to help you gain market share and cut processing times to execute daily tasks.

Verbella – Advanced OCR Solution

The advanced OCR capabilities of Kofax Transformation Modules and Brainware allow our experienced consultants to quickly replace time consuming manual data entry. The example on this page shows an invoice that has been captured either as paper, an email attachment, a pdf or even as EDI, and is being read by the OCR engine in Kofax. As shown the system can not only capture header data, but also line item details, automatically matching the PO information in your ERP system. Vendor data can be validated through database queries that run offline from your system.

Extraction of Header Data

Line Item Data Extracted and compared to Open PO items
